12-30-13	Fellows' Meeting		

FELLOWS INFO: (1) One week before your date, please give article to Becky McMahon to copy and hand out. (2) All articles must be original, from a peer-reviewed journal such as JCO, Blood, NEJM, Lancet, etc. Review articles are not acceptable. (3) If you cannot present on your date, please inform Dr. Al-Janadi well in advance so the schedule may be adjusted. If you are unable to present unexpectedly, the backup person for that date will be responsible.

GOALS AND OBJECTIVES RESEARCH CONFERENCE

The overriding goal of the research conference is to present on-going investigations by fellows and faculty. This may be in the complete form, but certainly could be in the hypothesis or preliminary data phase. Goals of this conference are to allow the fellow to:

1. organize their research in a form that can be clearly presented
2. generate hypotheses
3. critique each other's work.
4. collect and analyze data critically.
5. synthesize data into an oral presentation that could then be the precursor for publication of an abstract or a paper.

All the fellows will take part in this conference and will present research that they are currently working on.
